English , Hindi

PROJECTS

Recipe Finder

<https://recipe-finder-honey.netlify.app>

A Recipe Finder App. I built it using Vite + ReactJS, Tailwind CSS, and Bootstrap. In this app, you can search for any recipe you want. It's an awesome and very attractive app. Our app not only helps you find recipes easily but also provides a delightful browsing experience with its appealing design and user-friendly interface.

Weather App

https://honeypatkar.github.io/Weather_App/

A Weather App. I built it using React Js and Bootstrap Framework. In this app you can search weather data of any city or country you want. It shows the real time weather. It's an amazing app.

Personal Portfolio

<https://honeypatkar.github.io/my-portfolio/>

This is my personal portfolio website. I made it using React js. Here I have mentioned all of my projects and work.
